My name is Teena Martindale. In 2020 I had solar panels installed on my personal home at 1776 Wayah Dr, Charleston SC 29414 and a rental I own at 2915 Bolton Rd., Charleston SC 29414 and I planned to install them on another rental property. I am retired and was trying to reduce energy costs for myself in retirement in a way that also makes sense for the environment.

My panels produce extra energy which goes to Dominion Energy. How can they take my extra energy to sell others and then turn around and charge me additional fees for doing so. By adding unfair fees to individuals with solar panels you would be discouraging their use. Please protect the future of our environment by refusing to increase solar fees to individuals who have installed solar panels.

Every penny counts for each person at this time when many are without jobs, without insurance and otherwise suffering physically and emotionally because of the covid pandemic. Please refuse to allow additional fees to be added to my energy costs.

Thank you for listening and thank you in advance for your help in this matter.
